

# Hunter

Hunters are ranged combat specialists.

*Frost crouched on the tree branch, watching as the line of darkwalkers trampled his forest. His anger grew with each clumsy footfall and each crushed sapling.*

*But he measured his breath and waited and watched. Finally, his target appeared – the human who had led the blight of darkwalkers into the woods.*

*Frost's fingers closed around the shaft of the arrow that he had nocked on the bowstring. He slowly drew the shaft back. Each inch loaded the arrow with more and more power, until the wood strained at its limit.*

*He sighted along the arrow at the human, then breathed in, out, in, out, in, out, release...*

Hunters often have had early training as game hunters, forest wardens, trackers or even shepherds. Their calling leads to opportunities for adventure.

While most combatants rely on their strength of body, a hunter's key ability is Dexterity. Hunters operate from the periphery of the combat, using their accuracy to pinpoint their attacks at critical enemy targets.

Armed with a bow or a sling, hunters specialize in dangerous attacks on distant targets. When cornered, they can hold their own with melee weapons.

Hunters can use the most specialized martial ranged weapons, normal melee weapons and medium armor.

Hunters increase their ranged damage first and only later do they acquire more damaging melee attacks.

## Class Health Points

Class health points for hunters are:

- 5 health points per level

## Proficiencies

Hunters can use the following types of melee and ranged weapons and armor:

Melee Weapons	Simple	Normal	
Ranged Weapons	Simple	Normal	Martial
Armor	Light	Medium	

## Standard Power Progression

The hunter's progression of standard powers is:

- Increased melee damage gained at Level 6, 12 and 18
- Increased ranged damage at Level 3, 7, 11 and 15

## Key Ability Scores

The key ability scores for hunters are:

- Dexterity for ranged attacks, damage, and Defenses
- Constitution for health points
- Strength for melee attacks and damage

## Combat Specialties

The combat specialties for hunters are:

- Ranged combat

## Example Combat Powers

Examples of a hunter's combat powers include:

- *Pinpoint Shot*: Increased hit chance, less damage
- *Arrow-Split Shot*: Increased hit chance against target hit last turn.
- *Steady*: Increase hit chance of next ranged attack
- *Bull's-Eye Shot*: Decreased hit chance, more damage
- *Winging Shot*: Distract target, reducing its hit chance
- *Yew Strike*: Melee attack with wielded ranged weapon

The full list of hunter combat powers is on page 75 of this Player's Guide.

## Skills

Suggested hunter skills include:

- Tracking
- Stealth
- Hunting
- Trapping
- Horseriding
- Mounted combat
- Wilderness survival
- Animal handling/lore/training

# Powers: Attacks & Spells

All character classes have a series of progressively more potent powers that represent their unique abilities in and (in the case of some spells) out of combat.

Powers have the following elements that describe their use and effects:

- Action Time
- Condition
- Target
- Target(s)
- Attack
- Attack #
- Attacks
- Damage
- Damage #
- Attack Effect
- Hit Effect
- Miss Effect

Spell powers have these additional elements:

- Casting Time
- Interrupt Condition
- Cost
- Spell Effect
- Counter
- Duration
- Range
- Effect Area
- Materials

Finally, some powers (like *Shake It Off*) trigger ability tests:

- Test Effect
- Ability Test

## Elements of Powers

### Action Time

Unless otherwise noted, all powers are used as major actions. However, some actions have action times other than as a major action, such as a full action for a *War Cry* or *Wind-Up* powers or Interrupt for *Reflex Strike*.

### Casting Time

By default, spells require a major action to cast.

Some spells, such as *Healing Flash*, have shorter casting times equivalent to move or minor actions.

Other more powerful spells have longer casting times, ranging from full actions to minutes and hours.

### Interrupt Condition

Interrupt spells and powers are activated outside of the character's turn and have a specified interrupt condition. This condition must be met for the spell to be cast or the power to be used. Example interrupt conditions include:

- Cast as interrupt immediately after target makes an attack roll.
- You're hit with an attack that would reduce your HP to 0 or less.

### Cost

Spell powers have an anima point cost that must be paid before the spell resolves. Usually the cost is specified next to the title of the spell.

In some cases the spells have additional costs, such as variable cost (shown as X), or a cost based on some other factor, such as the anima points cost of the spell being countered or re-directed.

### Condition

Many powers have conditions that must be met for the power to be used. Example conditions include:

- Target in melee range (for melee attacks)
- Target in ranged weapon range (for ranged attacks)
- Hit by the target since the character's last round
- Character on less than ½ health points
- No damage yet inflicted in the combat encounter

### Target

Most powers affect a single target. If it specifies ally or enemy, then the power can only target allies or enemies.

### Target(s)

Some powers have radius effects or alternatively allow the character to affect multiple targets.

Some radius powers only affect allies within the effect area (such as *Healing Wave* spells) while others only affect enemies.

### Attack

The attack section details the attack bonus (Melee, Ranged, Magic), any other bonuses or penalties and the defense that is targeted: AD for Armor defense, ED for Evasion defense, MD for Magic defense, RD for Resilience defense.

### Attack #

A few rare powers allow attacks against multiple specific targets. These attacks are listed separately as they usually have different bonuses or penalties applied progressively.

### Attacks

Attacks against multiple targets which have the same bonuses or penalties list all of the attacks together instead of separately.

### Damage

The damage section defines how many damage dice are rolled and what bonuses or penalties are applied when an attack is successful. For melee and ranged attacks, the amount of damage dealt scales as the character gains levels.

Damage of 2d, 3d or 4d means roll twice, three times, or four times as many of the weapon's normal damage dice.

Many spells have variable damage, which is shown as X along with the type of dice, such as Xd6 or Xd8.

Furthermore, some spells change the type of damage dice based on the target of the spell, such as canonates' attacks against undead which deal Xd10 damage instead of Xd6.

Powers usually add the character's Melee, Ranged or Magic bonus to the final damage (or sometimes only this bonus damage is dealt):

- Melee bonus only
- Weapon + Melee (weapon damage + Melee bonus)
- 2d Weapon + Ranged (2d weapon damage + Ranged bonus)
- Xd6 + Magic bonus (d10s against undead)

## Damage #

If the attack power deals different amounts of damage for each of the separate attacks, such as powers with the Attack # component, then these amounts are detailed here.

## Power Effect

The power effect section lists the primary or secondary result of some powers, such as:

- Attack powers with secondary effects
- Healing powers like *Rally*

In attack powers, the power effects section details the secondary effects of the power which happen whether the attack hits or misses. For example, some attack powers hamper the character or reduce their Defenses when used, regardless of whether they hit or not.

## Spell Effect

Any spell that does anything other than direct damage has an effect. The spell effect component describes what the spell does when it is successfully cast, such as temporarily increasing the target's Attacks, Defenses, or healing.

If the spell attacks a target's Defenses (shown if it has an attack entry), then the spell effect only triggers if the spell attack is successful.

## Hit Effect

Hit effects are often secondary effects that only happen when the power's attack roll is successful.

Example hit effects include:

- Target knocked prone, dazed, stunned or immobilized
- Target is pushed back for each successful hit
- Character and target swap positions

## Miss Effect

Some attack powers and spells have alternate effects that occur when the attack roll misses the target. Those effects are listed in the miss effect section.

## Ability Test

This section details the ability test, such as:

- Ability bonus vs. 15 + level (of creature or caster that applied the effect).

## Test Effect

Powers with ability tests have an effect that triggers only if the test is passed.

## Range

The range section defines the range of spell powers. In the case of single target spells, this is the maximum range at which the entity can be targeted. Example ranges include:

- 5'
- Self
- Touch or self
- 10' + 10' per level

For spells with an effect area, the range is the maximum distance at which a spell's effect area can be centered.

## Effect Area

Area effect spells have a defined effect area, which is usually a radius from a specified position. All entities within this effect area are potential targets, depending on the power's target(s) details (such as 'All allies within effect area').

The effect area of spells is specified:

- Radius 5' per  $\frac{1}{2}$  Level bonus

In this example, the spell effect starts in the square occupied by the caster, and the radial effect spreads from there.

### Example:

A Level 4 warlock casts *Fire Blast* (a Level 3 spell). The Caster's  $\frac{1}{2}$  Level bonus is 2, so the *Fire Blast* has a radius of 10'. The spell effect starts from the caster, and then stretches 10' from there.

If using a grid, this stretches 2 squares from the caster – not including the square occupied by the caster – giving a total effect radius of 5 squares by 5 squares.

If using descriptive combat, this effect would reach the second rank of monsters (or unfortunate allies) around the caster.

Other alternative effect area types include:

- *Lightning Chain* has a total length of 10' + 10' per  $\frac{1}{2}$  Level bonus
- 5' square + 5' square per caster level

## Effect Range

Spells that give characters ongoing enhancements, such as *Detect Magic*, have an effect range that details the range of the ongoing effect.

## Duration

If a spell's effect is not resolved immediately when cast, then the ongoing duration of the spell's effect is defined in rounds (rnd), minutes (min), hours (hr) or longer.

- Until the end of the target's next turn
- 1 rnd + 1 rnd per level
- 1 min + 1 min per level

If the spell effect lasts for multiple rounds, then it expires at the end of the caster's turn on the final round.

## Counter

The counter aspect of a power defines circumstances in which the spell effect is immediately ended.

## Special

Special aspects of powers allow unique requirements or effects not covered in the other areas, such as:

- Multiple attacks against the same target that only end on a miss

## Materials

Scrolls, wands and potions require specific materials in their creation.

# Power Glossary

- **½ Level:** The ½ Level bonus of the character who is using the power.
- **Ability Test:** An ability test during combat, including the relevant ability and difficulty.
- **Adjacent (two targets):** Standing within 5' of each other.
- **Adjacent (three or more targets):** Without gaps between the targets (i.e. an unbroken line can be traced between all of the targets).
- **Ally/Allies:** Allies are the other creatures, adventurers or game characters who fight on the same side as the character (but not the character itself).
- **Arc (90°):** Effect area, which extends from the character out to the radius or range, but its angle is constrained to 90°.
- **Arc (180°):** Effect area, which extends from the character out to the radius or range, but its angle is constrained to 180°.
- **Attack:** A melee, ranged or magic attack.
- **Attacker:** The creature that has made the attack.
- **Aura:** Ongoing radial effect area that is centered on a creature. A creature can only have one active aura.
- **Bonus:** Any modifier that increases an attack roll.
- **Caster:** The character who is using the spell.
- **Caster Level:** The level of the character who is using or originally used the spell power.
- **Character:** The character who is using the power.
- **Combatant:** Anyone in the combat encounter, including all allies, enemies, and unaligned.
- **Contiguous:** Without gaps between the targets (i.e. an unbroken line can be traced between all of the targets).
- **Creature:** Any entity, including all allies and enemies.
- **Creature Level:** The level of the creature who is using or originally used the power.
- **Critical Weapon Damage:** The highest possible damage a weapon and power could deal.
- **Damage:** The amount of damage that is being dealt.
- **Dealer:** The creature that has made the attack.
- **Day:** The period of time between long rests, usually starting at dawn.
- **Defense:** The specific defense being targeted.
- **Defenses:** All four of the creature's Defenses (AD, ED, MD, RD).
- **Encounter:** A single challenge in the game; combat, trap, adversarial game character, puzzle, or non-trivial ability test.
- **Enemy/Enemies:** Monsters, adventurers, or game characters who fight in opposition to the character.
- **Engaged:** The creature has been the target of a melee attack by someone other than the character since the end of the character's last turn.
- **Hit:** An attack roll that is successful (it is equal or higher than the defense against which it is rolled).
- **Initiative:** The order that player characters and game characters act in each round, from highest to lowest.
- **Melee Range:** Within the melee range of the character's weapon.
- **Miss:** An attack roll that is unsuccessful (it is lower than the defense against which it is rolled).
- **Off-Hand:** Character's secondary hand, used for shield, two-handed weapons, alternate weapons or potions.
- **Once Per Turn:** Powers that can be used once per turn reset at the start of the character's turn.
- **Other:** Anyone except for the character using the power or spell.
- **Origin:** The starting location of an action.
- **Overlap:** Character's line of sight must pass through the closest target and all subsequent targets.
- **Penalty:** Any modifier that decreases an attack roll.
- **Pierce:** A type of weapon or projectile that can enter and pass through the body of a target.
- **Position:** The area occupied by a creature.
- **Pushed Back:** Target is moved in a straight line away from the character (including diagonally if using a grid), in a direction decided by the character's player.
- **Radius:** Area of a spell's effect, counted in 5' increments from the caster, but not including the spell's origin. Thus, a 5' radius spell has an actual diameter of 15'.
- **Range:** The distance at which a spell can reach a target or where the effect area can be centered.
- **Ranged Weapon Range:** Within the furthest range increment of the character's ranged weapon (penalties may apply).
- **Retreat:** Move back to the origin of the move or power.
- **Round:** 5-10 seconds. All player characters, game characters and monsters have a turn during a round.
- **Self:** The character casting the spell.
- **Slung:** The character's easily accessible second weapon.
- **Step:** The incremental effect of a spell.
- **Target(s):** The target or targets of the spell. Usually allies or enemies, but creative players might try to target non-combatants or inanimate objects (GM discretion applies here).
- **Touch:** A target close enough to be touched (the same as the character's melee range, i.e. within 5').
- **Turn:** The actions of a single player character, game character or group of monsters during a round.
- **Unaware:** The target is not aware of the position of the character, such as through invisibility or Stealth.
- **Undead:** Creatures with the characteristic 'Undead'.
- **Wielding:** The character's currently held weapon.
- **Worn:** A piece of clothing (other than armor) currently worn by the character.
- **You:** The character or caster who is using the power.

# Hunter Powers

CHP	5 health points per level		
Melee	Simple	Normal	
Ranged	Simple	Normal	Martial
Armor	Light	Medium	

## Level 1

### Melee Attack

Condition	Target in melee range.
Attack	Melee vs. AD
Damage	Weapon + Melee
Level 6:	2d Weapon + Melee
Level 12:	3d Weapon + Melee
Level 18:	4d Weapon + Melee

### Ranged Attack

Condition	Target in ranged weapon range.
Attack	Ranged vs. AD
Damage	Weapon + Ranged
Level 3:	2d Weapon + Ranged
Level 7:	3d Weapon + Ranged
Level 11:	4d Weapon + Ranged
Level 15:	5d Weapon + Ranged

### Pinpoint Shot

Condition	Target in ranged weapon range.
Attack	Ranged + 2 vs. AD
Damage	Weapon + Ranged - 2
Level 3:	2d Weapon + Ranged - 4
Level 7:	3d Weapon + Ranged - 6
Level 11:	4d Weapon + Ranged - 8

### + Rally

Action Time	Full action
Power Effect	You regain half of the amount that your HP and AP are depleted. You gain +4 to Defenses until end of your next turn.
Special	This can only be used once per encounter.

### Shake It Off

Test Effect	Remove one ongoing condition or spell effect (e.g. daze, bane, poison, immobilize, etc).
Ability Test	Ability bonus vs. 15 + level (of creature or caster that applied the condition/spell effect).

## Level 2

### Steady

Action Time	Full action
Power Effect	+4 to ranged attack roll, bonus expires on any other action.

### Arrow-Split Shot

Condition	Target in ranged weapon range. You hit target with ranged attack last turn.
Attack	Ranged + 2 vs. AD
Damage	Weapon + Ranged
Level 4:	2d Weapon + Ranged
Level 8:	3d Weapon + Ranged
Level 12:	4d Weapon + Ranged

## Level 3

### Bull's-Eye Shot

Condition	Target in ranged weapon range.
Attack	Ranged - 4 vs. AD
Damage	3d Weapon + Ranged
Level 7:	4d Weapon + Ranged
Level 11:	5d Weapon + Ranged

### Winging Shot

Condition	Target in ranged weapon range.
Attack	Ranged - 2 vs. AD
Damage	Weapon + Ranged
Level 3:	2d Weapon + Ranged
Level 7:	3d Weapon + Ranged
Level 11:	4d Weapon + Ranged
Power Effect	Target takes -2 to Attacks until end of target's next turn.

## Level 4

### Through Shot

Condition	All overlapped targets in ranged weapon range. You're wielding a piercing ranged weapon (bolt, arrow, spear, etc).
Attacks	Ranged – 2 vs. AD
Damage	Weapon + Ranged
Special	Up to two targets.
Level 8	Up to three targets.
Level 12	Up to four targets.

### Yew Strike

Condition	Target in melee range. You're wielding ranged weapon.
Attack	Melee vs. AD
Damage	Melee bonus only
Level 8:	Weapon + Melee
Level 12:	2d Weapon + Melee
Level 16:	3d Weapon + Melee

## Level 5

### Hobble Shot

Condition	Target in ranged weapon range.
Attack	Ranged vs. AD
Damage	Weapon + Ranged
Level 9:	2d Weapon + Ranged
Level 13:	3d Weapon + Ranged
Level 17:	4d Weapon + Ranged
Hit Effect	Target immobilized (–2 to Defenses, cannot move intentionally) until end of target's next turn.

## Quick Strike

Action Time	Interrupt
Interrupt Condition	Target moves out of melee range and travels more than 5' in a single move.
Attack	Melee vs. AD
Damage	Melee bonus only
Level 11:	Weapon + Melee
Power Effect	You're hampered (only has major and minor action) until end of your next turn.
Special	Melee attack with either melee or ranged weapon.

## Level 6

### Kick-Back

Action Time	Full action
Condition	Target in melee range.
Test Effect	Target pushed back 5'. Ranged attack at target.
Ability Test	Strength vs. 15 + creature level.
Attack	Ranged vs. AD
Damage	Weapon + Melee
Level 10:	2d Weapon + Melee
Level 14:	3d Weapon + Melee
Level 18:	4d Weapon + Melee
Special	You make an ability test to push target away. If successful, you make a ranged attack.

## Level 7

### Multi-Shot

Condition	All targets must be adjacent and in ranged weapon range.
Attacks	Ranged – 2 vs. AD
Damage	Weapon + Ranged
Special	Up to three targets.
Level 11	Up to four targets.
Level 15	Up to five targets.

## Level 8

### Cover-Step Shot

Condition	Target in ranged weapon range.
Attack	Ranged vs. AD
Damage	2d Weapon + Ranged
Level 12:	3d Weapon + Ranged
Level 16:	4d Weapon + Ranged
Special	You move 5', attack, then return to origin.

## Level 9

### Deft Attack

Condition	Target in melee range.
Attack	Ranged vs. AD
Damage	2d Weapon + Melee
Level 15:	3d Weapon + Melee
Special	You use your Ranged bonus used for a melee attack.

## Level 10

### Evasive Shot

Condition	Target in ranged weapon range.
Attack	Ranged vs. AD
Damage	2d Weapon + Ranged
Level 14:	3d Weapon + Ranged
Level 18:	4d Weapon + Ranged
Power Effect	You gain +2 to AD and ED until end of your next turn.
